

```

int n1;

void setup()
{
    pinMode(13,OUTPUT);
    n1 = 0;
}

void loop()
{
    int m = n1%2;
    if(m == 0)
    {
        digitalWrite(13,0); // 2 4 6 8 10 12.....
    }
    else
    {
        digitalWrite(13,1); // 1 3 5 7 9 11.....

    }
    n1 = n1+1;                // 1 2 3 4 5 6 7 8 9 10 11
12.....
    delay(500);               // 500ms

}

```
